

CONFIGURATION AND TECHNICAL REQUIREMENTS FOR PARTICIPATING TO A LIVE WEB

SYSTEM SETUP FOR **SPEAKERS** AND **ACTIVE PARTICIPANTS** (USE OF WEBCAM AND/OR MICROFONE)

- **DSL cable connection** with **DOWNLOAD minimum speed of 0.800 Mb/s, UPLOAD minimum speed of 0.256 Mb/s**. [CLICK HERE](#) to download the instructions to perform the connection speed test in the following website: www.Speedtest.net.
- **DO NOT use Wireless or Wi-Fi connections** since they are often subject to signal interruptions even if apparently very fast (in fact when browsing the internet they are not detectable) due to environmental interferences (cellular phones, electric motors, microwaves...). The use of such connections can reduce the video and audio quality of the Live Web and the internet streaming.
- **DO NOT USE softwares that require internet connection**, while attending a Live Web or streaming a recording. For example, e-mail softwares, dropbox, internet browsers, peer-to-peer software (such as e-Mule or Bittorrent) not even on other computers on the same network. These software require a lot of bitrate even if apparently inactive.
- **We suggest to use earphones (better if a microphone integrated)**, this because eliminate the audio rebound and keep the mouth at a constant distance to the microphone increasing the quality of the conversation. As an alternative, simple earphones can be used, in this case the integrated microphone will be used.

REQUIREMENTS FOR NON ACTIVE PARTICIPANTS

- **DSL cable connection** with **DOWNLOAD minimum speed of 0,500 Mb/s**. [CLICK HERE](#) to download the instructions to perform the connection speed test in the following website: www.Speedtest.net.
- **DO NOT use Wireless or Wi-Fi connections** since they are often subject to signal interruptions even if apparently very fast (in fact when browsing the internet they are not detectable) due to environmental interferences (cellular phones, electric motors, microwaves...). The use of such connections can reduce the video and audio quality of the Live Web and the internet streaming.
- **DO NOT USE softwares that require internet connection**, while attending a Live Web or streaming a recording. For example, e-mail softwares, dropbox, internet browsers, peer-to-peer software (such as e-Mule or Bittorrent) not even on other computers on the same network. These software require a lot of bitrate even if apparently inactive.

NOTE: The use of wireless connections is, in the majority of the cases, sufficient to achieve an acceptable quality. It should be remembered, anyway, that short pauses in the audio/video transmission can present. These possible interruptions are not related to the quality of the presentation or the software or source transmission handled by IDEAT Italy.

S Y S T E M R E Q U I R E M E N T S

Microsoft® Windows Vista or later versions

- Microsoft Internet Explorer 7
- Mozilla Firefox 2
- Adobe Flash® Player 8 or later versions

Microsoft Windows® XP (Service Pack 2)

- Microsoft Internet Explorer 6 o 7
- Mozilla Firefox 1.x o 2.x
- Netscape 7.x
- Adobe Flash Player 8 or later versions

Mac OS X v. 10.4, 10.5 (Intel) or later

- Safari 2.x
- Firefox 1.5.0.3, 2.x
- Chrome 16.x
- Adobe Flash Player 8 or later versions
